Subject: CIEES Letter of Support for Manna Farms
Date: Nov 29, 2016, 3:16:00 PM
To: Donna Lanzetta donna@mannafishfarms.com

Dear Donna:

Please find attached the letter of support that you have requested.

Regards

Alejandro

November 29, 2016

Saltonstall- Kennedy Center
To whom it may concern:

Our center has been chosen by Manna Fish Farms to become the consulting institution for addressing and developing the electrical energy framework necessary for operating the planned offshore fish farm. This is a sophisticated and state of the art enterprise, which will require not only to develop the tools which will provide operational electrical power for managing operations but also for collecting and receiving data from arrays of sensors which will be essential for operational information feedback. Furthermore, the latter array will constitute the backbone that will allow Manna Fish Farms to accomplish their educational agenda.

We feel that Manna Farms goals are an example on how technology can help in the production of renewable high-protein food supply for a constantly increasing world population. We are proud to have been chosen to help them in spearheading the execution of their roadmap.

Sincerely
