RE: Manna Fish Farms, Inc. – 361 Beach Road - Shinnecock Fish Dock Renovation

Dear Ms. Longworth –

My name is Norman Stiansen and my family/I have been a fisherman/fisherwoman out of Shinnecock for over 30 years. I currently own/work on F/V Elizabeth E F/V, and my boat is currently docked at _____.

I am writing in support of grant # 82810 entitled Shinnecock Working Waterfront Revitalization. The grant seeks financial support to renovate the waterfront at the Shinnecock Fish Dock, to rebuild the marina, to add electrical upgrades and commercial ice machine, including bringing three phase electric three miles over Ponquogue bridge and down to Dune Road. In order to operate the commercial ice machines, this three-phase electric is required. Currently, there is no three-phase electric on Dune Road, and the Shinnecock Fish Dock is operating using bagged ice. Other restaurants and the other pack out facility at Oaklands use diesel powered generators, also inefficient, environmentally unsustainable, and very expensive. These expenses and inefficiencies are passed on to the hard-working commercial fishing men and women, substantially reducing potential profits for the fleet members packing out at Shinnecock Fish Dock.

Shinnecock Inlet is home of the second largest commercial fishing fleet in New York State, and this grant will support upgrades to the Shinnecock Fish Dock at Shinnecock Inlet, upgrades to allow the Dock to continue pack out operations in a safer and more productive environment.
